### FINANCIAL PERFORMANCE

Group revenue for the six months to 30 June 2021 decreased by 3%, in comparison with same period in prior year. This is mainly due to Covid-19 related non-invoicing and discounted invoicing for some tenants that were severely impacted by the second and third wave of the pandemic. Set in a tough challenging economic environment the Group lost few key tenants despite capping its rental billing exchange rate at around 25% below market spot rate. Coincidentally, the overall group portfolio vacancies remained almost the same at 31.8% as at 30<sup>th</sup> June 2021 compared with 31.7% at same point in the previous year.

The Group incurred a loss of ZMW244.5 million for the half year in 2021 as compared with a profit of ZMW 46.8million for the same period in 2020. This loss has arisen mainly due to the decrease in fair value of investment properties, particularly the Arcades Shopping Center which was adversely affected by the second and third wave of the pandemic. Higher vacancies rates, 7% increase in the first quarter of 2021, and rental income loss related to Covid 19 concessions contributed to the significant valuation loss at the Arcades Shopping Center.

### FAIR VALUE OF INVESTMENT PROPERTY PORTFOLIO

As noted above the fair value of the Group's investment property portfolio decreased by 18% from ZMW 1.14 billion to ZMW 938.9 million, in the first half of the year. The fair value of the Group's investment property portfolio was determined as at 30 June 2021 by external independent and professional property valuation experts, Knight Frank Zambia Limited, who possess appropriate internationally recognised professional qualifications and have requisite experience in the location and category of the properties that were valued. Revaluation is done twice a year as at 30<sup>th</sup> June and at 31<sup>st</sup> December in order for the Group's financial statements to provide reliable, relevant and up-to-date information about its financial position and performance.

### **CASHFLOWS**

The Group recorded a decrease in cash generated from operating activities to ZMW11.4 million, down from ZMW 14.3 million for the same period in prior year. This represents a 20% decline which is mainly attributable to lower revenue on account of higher vacancies and Covid-19 related restrictions. Overall, the Group experienced a net reduction in cash and cash equivalents during the period.

### INTERIM DIVIDEND

The Directors resolved not to pay an interim dividend for the half year.

The Directors will review the results for the full year and consider recommendation of a dividend for approval by Shareholders at the Annual General Meeting (AGM) that will be held before 31 March 2022.

### **BUSINESS OUTLOOK**

The property industry is expected to remain challenging for the remainder of the year with the adverse market forces that characterized the first half of 2021 continuing to prevail in the second half particularly regarding occupancy levels and market rental rates. However the recent appreciation of the Kwacha against major currencies provides hope for a better market confidence and the company is expected to benefit from market rental increase rate per square meters. In addition, we have seen an increase level of enquiries for office and retail space following the completion of a peaceful and successfully held general elections in Zambia.
